Reviewer's report

Title: Diagnostic utility of zinc protoporphyrin to detect iron deficiency in Kenyan pregnant women

Version: 2 Date: 6 October 2014

Reviewer: Bernard J Brabin

Reviewer's report:

The authors in their revised manuscript give prevalence estimates for vitamin B12 and folate deficiency. These estimates are very low prevalence and below 1%.

This finding deserves comment in the discussion.

Quality of written English: Acceptable

Statistical review: Yes, and I have assessed the statistics in my report.
