Reviewer's report

Title: Central pathways causing fatigue in neuro-inflammatory and autoimmune illnesses.

Version: 1 Date: 1 December 2014

Reviewer: Yehuda Shoenfeld

Reviewer's report:

An interesting subject alluding to the immune stimulation responsible for C.F.S. This article should be supplemented by adjuvant stimulation and CFS like in MMF (Macrophage faciitis syndrome, silicone induced CFS, and vaccines (i.e. alluminium) induced CFS (i.e. the "ASIA" syndrome).

Needs an explanation how by chronic stimulation of TLR lead to fatigue.

Refer to cytokonic differences found in patients with CFS.

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
