Reviewer’s report

Title: Prescriber and patient-oriented behavioural interventions to improve use of malaria rapid diagnostic tests in Tanzania: facility-based cluster randomised trial

Version: 3 Date: 8 March 2015

Reviewer: Stefan Peterson

Reviewer’s report:

I am happy with the revisions made and arguments put forth.

However, on page 17 one sentence caught my interest - "..near zero overdiagnosis... become increasingly important if artemisinin resistance spreads..."

If parasitemia is not present (overdiagnosis), how can overuse of ACTs then promote resistance, esp with a fast elimination drug?

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
