Reviewer's report

Title: Safety and Efficacy of Anti-PCSK9 Antibodies: A Meta-analysis of 25 Randomized, Controlled Trials

Version: 1 Date: 1 April 2015

Reviewer: Evangelos Liberopoulos

Reviewer's report:

This is an excellent and very informative meta-analysis on a very hot topic. Some minor comments:
1. All abbreviations should be defined when first used in the text (e.g. LDL-C).
2. Page 7; line 15: one study was not...
3. Page 7; line 16: too few.
4. Page 13; lines 15-16: needs rephrasing
5. The very recent New England Journal of Medicine publications regarding the effect of antiPCSK9 antibodies on CVD events (ODYSSEY LONG TERM and OSLER trials) should be included and discussed.

Quality of written English: Needs some language corrections before being published

Statistical review: No, the manuscript does not need to be seen by a statistician.
