Reviewer’s report

Title: Effects of an 18-week exercise programme started early during breast cancer treatment: a randomised controlled trial

Version: 2 Date: 16 April 2015

Reviewer: Karen Steindorf

Reviewer’s report:

The authors have basically answered my points sufficiently well to allow their manuscript to be published.

My only discretionary revision is:
Please check whether the information on my comment 7 is given in the manuscript, and if not, please consider to add it as other readers from countries with a higher proportion of neo-adjuvant therapy might raise the same question.

The manuscript can be accepted without further revisions

Quality of written English: Acceptable

Statistical review: Yes, and I have assessed the statistics in my report.

Declaration of competing interests:
