Reviewer’s report

**Title:** Microvascular obstruction and endothelial activation are independently associated with the clinical manifestations of severe falciparum malaria in adults.

**Version:** 2  **Date:** 28 April 2015

**Reviewer:** Malcolm Edward Molyneux

**Reviewer’s report:**

The revised manuscript has taken on board adequately the suggestions I made as a reviewer of the first version of this paper. I have no further major or minor revisions to recommend now.

**Quality of written English:** Acceptable

**Statistical review:** No, the manuscript does not need to be seen by a statistician.
