Reviewer’s report

Title: Testicular cancer in men with Down syndrome

Version: 2 Date: 3 June 2015

Reviewer: Irene Tuffrey-Wijne

Reviewer’s report:

This is now a much improved, and in my view indeed an excellent, paper. The revisions have led to much greater clarity about its scope and context. The title and abstract now cover adequately what the paper is about, which will help readers.

I feel that the authors have responded successfully to my comments. The inclusion of further detail on issues around testicular cancer for men with Down syndrome, compared with the general population, is particularly helpful.

I feel this paper will make a useful contribution to the existing literature.

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
