Title: Pre-diagnostic metabolite concentrations and prostate cancer risk in 1077 cases and 1077 matched controls in the European Prospective Investigation into Cancer and Nutrition

Version: 1 Date: 22 May 2017

Reviewer: Elizabeth Want

Reviewer’s report:

This manuscript is now much improved. The authors appear to have addressed the majority of the reviewer comments and adjusted the manuscript accordingly. The resulting manuscript flows much better. It includes sufficient detail regarding the background and methods. Limitations and future work are now more comprehensive. I have a minor comment below and am happy for the manuscript to be accepted for publication.

* Please change "Exclusions of men and metabolites" to "Exclusion of participants and metabolites"

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.
