Reviewer’s report

Title: Effect of Transmission Intensity on Hotspots and Micro-Epidemiology of Malaria in sub-Saharan Africa

Version: 1  Date: 26 Apr 2017

Reviewer: Samir Bhatt

Reviewer’s report:

I am satisfied with the authors responses to my concerns and am happy with the manuscript as is.

I still worry about the methodology used for their regression. They use polynomial regression but do not provide generalisation (prediction) accuracy.

However, this is my only concern and I do not believe that this is enough to prevent publication.

Are the methods appropriate and well described?
