General comments

1. Response to my numerous issues was appropriate. My minor caveats remaining are not sufficient to hold up the urgent need for publication of this work.

Specific comments

2. The last sentence of the abstract is awkward and hard to understand

3. The equation in line 124 seems to have a surplus of parameters. kP(j) would not seem to need both a k and P. Maybe for some purposes both parameters are needed. If so, there should be an explanation of why they are needed.

4. There are incomplete references, such as 8 and 9.
