Reviewer’s report:

Congratulations on your work. The paper is well written and concerns an interesting subject. There are 2 issues you should comment on in your paper:

1. Please comment on your result that OR of previous history of GDM or PE is 0.58. What is your hypothesis on that?

2. Could you describe what were the interventions performed in your study group. Obesity is a known risk factor of thrombo-embolism - were there any antithrombotic prophylaxis administered? Was low dose aspirin administered in obese women to prevent preeclampsia?

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I am able to assess the statistics
