Title: Reconsidering the prognosis of major depressive disorder across diagnostic boundaries: full recovery is the exception rather than the rule

Version: 1 Date: 06 Sep 2017

Reviewer: Pamela Schettler

Reviewer's report:

The paper requires the following small corrections to the revised manuscript:

Line 286 needs "and" changed to "or" so that it reads "...to either the time frame or the diagnostic conceptualisation"

Line 222 needs the first word changed from "After" to "During" and "53.2%" later in that sentence needs to be changed to "60.5%" (to match the figure in the Table 2). The resulting sentence should read: "During 2 years of follow-up (see Table 2) the recurrence of MDD was 63.2% and 60.5% had at least one other disorder."
