Title: MDR-TB treatment adherence in migrants: a systematic review and meta-analysis

Version: 1 Date: 01 Dec 2017

Reviewer's report:

Dear editor

I think this manuscript has significantly improved and I am glad to see that most recommendations have been taken on. I understand the reasons for the restricted inclusion of literature and follow the argument entirely and I am pleased to see that the discussion acknowledges a lot of that too, but of course it does unfortunately remain a highly restricted review of the literature. Because it is valid to restrict as it is done and because there is nothing in itself wrong with that and of course there are no problems with methods, the results and the interpretation thereof, this is then not a peer reviewers’ but rather an editorial judgement about the paper, so with this I shall devolve to you for final decision making.

Very best wishes
