Reviewer’s report

Title: A Personalized Intervention to Prevent Depression in Primary Care: Cost-effectiveness Study Nested into a Clustered Randomized Trial

Version: 1 Date: 09 Nov 2017

Reviewer: M. E van den Akker-van Marle

Reviewer's report:

The authors have responded sufficiently to most of the comments to the previous version of the article, but two comments have not been processed yet and need to be done:

- In table 2 the decimal places used in reporting ICERs should be removed, otherwise too much precision is suggested.

- The x-axis of figure 3 is not appropriate. In this way the graph is convex at low values of the WTP, but (with a normal axis) it is concave. Furthermore, the low value of the WTP of €1000 per QALY is not relevant, as threshold in most countries are around €50,000, so the addition of this specific point at the x-axis is not useful.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I am able to assess the statistics
Quality of written English
Please indicate the quality of language in the manuscript:

Declaration of competing interests
Please complete a declaration of competing interests, considering the following questions:

1. Have you in the past five years received reimbursements, fees, funding, or salary from an organisation that may in any way gain or lose financially from the publication of this manuscript, either now or in the future?

2. Do you hold any stocks or shares in an organisation that may in any way gain or lose financially from the publication of this manuscript, either now or in the future?

3. Do you hold or are you currently applying for any patents relating to the content of the manuscript?

4. Have you received reimbursements, fees, funding, or salary from an organization that holds or has applied for patents relating to the content of the manuscript?

5. Do you have any other financial competing interests?

6. Do you have any non-financial competing interests in relation to this paper?

If you can answer no to all of the above, write 'I declare that I have no competing interests' below. If your reply is yes to any, please give details below.

I declare that I have no competing interests
