Reviewer’s report

Title: The impact of repeated vaccination on influenza vaccine effectiveness: a systematic review and meta-analysis

Version: 0 Date: 10 Sep 2018

Reviewer: Michael Jackson

Reviewer’s report:

This is an update to a previous paper, which was retracted due to erroneous inclusion of invalid data. The revised version retains the strengths of the original paper. In particular, the paper addresses three separate questions of interest. Two of these questions focus on repeated vaccination from the patient perspective (conditional on receipt or non-receipt of last year's influenza vaccine, should a patient receive the current year's vaccine?). The third focuses from the policy perspective - is there the possibility of sub-optimal vaccine protection in the long term due to repeated annual vaccination? The analyses are appropriate to the questions of interest, and the conclusions justified by the results.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I am able to assess the statistics

Quality of written English
Please indicate the quality of language in the manuscript:

Declaration of competing interests
Please complete a declaration of competing interests, considering the following questions:

1. Have you in the past five years received reimbursements, fees, funding, or salary from an organisation that may in any way gain or lose financially from the publication of this manuscript, either now or in the future?

2. Do you hold any stocks or shares in an organisation that may in any way gain or lose financially from the publication of this manuscript, either now or in the future?

3. Do you hold or are you currently applying for any patents relating to the content of the manuscript?

4. Have you received reimbursements, fees, funding, or salary from an organization that holds or has applied for patents relating to the content of the manuscript?

5. Do you have any other financial competing interests?

6. Do you have any non-financial competing interests in relation to this paper?

If you can answer no to all of the above, write 'I declare that I have no competing interests' below. If your reply is yes to any, please give details below.

I declare that I have no competing interests.

Statement on potential review bias
Please complete a statement on potential review bias, considering the following questions:

1. Did you co-author any publication with an author of this manuscript in the last 5 years?

2. Are you currently or recently affiliated at the same institution as an author of this manuscript?

If you can answer no to all of the above, write 'I declare that I did not publish with these authors in the last 5 years and also meet the affiliation criteria". If your reply is yes to any, please give details below.

I co-authored a paper (currently in press) on influenza vaccine effectiveness in pregnant women with co-author Dr. Jeffrey Kwong.
