Title: Specialist palliative care support is associated with improved pain relief at home during the last 3 months of life in patients with advanced disease: analysis of 5-year data from the national survey of bereaved people (VOICES)

Version: 2 Date: 29 Jan 2019

Reviewer: Katherine Sleeman

Reviewer's report:

Thank you for making the changes suggested. A few things:

Abstract. Results. Final sentence not relevant, it describes an analysis that is nothing to do with your aim, is therefore confusing, and does not contain any statistics to allow the reader to understand significance of statement. Suggest remove.

Methods page 6 line 126. Does not make sense grammatically.

Page 6 line 139 - the sentence does not finish.

Fig 2 is very confusing - needs a clearer legend
