Reviewer’s report

Title: Development and validation of a prognostic model to predict the prognosis of patients who underwent chemotherapy and resection of pancreatic adenocarcinoma: A large international population-based cohort study

Version: 0 Date: 07 Dec 2018

Reviewer: Wenhui Lou

Reviewer's report:

This is a good job based on large population, all resected stage 1-2 PDAC patients with adjuvant chemotherapy, I think the conclusion is convincing. The inadequacy of the study is the lacking of detail information of chemotherapy, especially during the long time span of data collected, the chemotherapy changed greatly, from agent to formula, but this is the natural deficiency of registry database.

Are the methods appropriate and well described?  
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?  
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?  
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?  
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I recommend additional statistical review
