Title: Estimating the burden of dengue and the impact of release of wMel Wolbachia infected mosquitoes in Indonesia: a modelling study

Version: 2 Date: 16 Jul 2019

Reviewer: Giorgio Guzzetta

Reviewer's report:

I thank the authors for carefully addressing all of my comments. I believe that the added Figure S2 further highlights the limitation concerning quality and reliability of available datasets, which is already extensively discussed by the authors. Therefore, I would only suggest to underline the variability of the dengue burden averted by Wolbachia in line 426, reporting the uncertainty interval rather than (or in addition to) the average.

Are the methods appropriate and well described?
