Reviewer’s report

Title: Adolescent Polycystic Ovary Syndrome according to the International Evidence-Based Guideline

Version: 3 Date: 20 Jan 2020

Reviewer: Corrine Welt

Reviewer's report:

I would suggest adding some additional wording based on the response you have provided. The twelve studies including women had averaged ages between 24.9 and 31.2 years, [but women aged 18-24 years are included in the data].

Furthermore, polycystic ovarian morphology may represent a marker or may be normal in young women, a population study showed a higher prevalence of polycystic ovarian morphology in very young women without menstrual irregularity and hyperandrogenism the correlation between ovarian morphology (ovarian size and follicle numbers) and menstrual function is inconsistent in adolescence and early adulthood [although these studies use older criteria for PCO morphology and none of the criteria for PCO morphology have used age-based cutoffs]. [55]

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Unable to assess

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I am able to assess the statistics

Quality of written English
Please indicate the quality of language in the manuscript:

Declaration of competing interests
Please complete a declaration of competing interests, considering the following questions:

1. Have you in the past five years received reimbursements, fees, funding, or salary from an organisation that may in any way gain or lose financially from the publication of this manuscript, either now or in the future?

2. Do you hold any stocks or shares in an organisation that may in any way gain or lose financially from the publication of this manuscript, either now or in the future?

3. Do you hold or are you currently applying for any patents relating to the content of the manuscript?

4. Have you received reimbursements, fees, funding, or salary from an organization that holds or has applied for patents relating to the content of the manuscript?

5. Do you have any other financial competing interests?

6. Do you have any non-financial competing interests in relation to this paper?

If you can answer no to all of the above, write 'I declare that I have no competing interests' below. If your reply is yes to any, please give details below.

No/no

Statement on potential review bias
Please complete a statement on potential review bias, considering the following questions:

1. Did you co-author any publication with an author of this manuscript in the last 5 years?

2. Are you currently or recently affiliated at the same institution as an author of this manuscript?

If you can answer no to all of the above, write 'I declare that I did not publish with these authors in the last 5 years and also meet the affiliation criteria”. If your reply is yes to any, please give details below.

No/no
