Reviewer’s report

Title: The Caudate Nucleus Undergoes Dramatic and Unique Transcriptional Changes in Human Prodromal Huntington's Disease Brain

Version: 0 Date: 01 Jun 2019

Reviewer: Jolanta Dorszewska

Reviewer’s report:

The manuscript presents cutting-edge molecular research at Prodromal Huntington's Disease. It brings new information to the pathogenesis of Huntington's disease. It is methodologically correct.

My comments:

Complete the abstract with important gene relationships for HD and HD +.

Explain why these genes were analyzed?

Report which genes, in the opinion of the authors, can be important prognostically and predictively and for the progression of the disease or carrier.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I am able to assess the statistics
