Reviewer's report

Title: Epigenetic Landscapes Suggest that Genetic Risk for Intracranial Aneurysm Operates on the Endothelium

Version: 0 Date: 04 Jul 2019

Reviewer: Ynte M Ruigrok

Reviewer's report:

The authors write in the Introduction section that "Genome-wide association studies (GWAS) have identified many single nucleotide polymorphisms (SNPs) that occur more commonly in individuals with IAs." However, they do not describe the results of these GWAS nor do they cite any references. This should be added.

The discussion section starts off with an exact repetition of the introduction section. The whole first part of the discussion until paragraph 'Genetic risk in the endothelium of persons with IA' should be omitted.

A previous study already investigated the role of intracranial aneurysm-associated single-nucleotide polymorphisms on regulatory DNA elements:

This study should be discussed.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Unable to assess

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I am able to assess the statistics

Quality of written English
Please indicate the quality of language in the manuscript:

**Declaration of competing interests**
Please complete a declaration of competing interests, considering the following questions:

1. Have you in the past five years received reimbursements, fees, funding, or salary from an organisation that may in any way gain or lose financially from the publication of this manuscript, either now or in the future?

2. Do you hold any stocks or shares in an organisation that may in any way gain or lose financially from the publication of this manuscript, either now or in the future?

3. Do you hold or are you currently applying for any patents relating to the content of the manuscript?

4. Have you received reimbursements, fees, funding, or salary from an organization that holds or has applied for patents relating to the content of the manuscript?

5. Do you have any other financial competing interests?

6. Do you have any non-financial competing interests in relation to this paper?

If you can answer no to all of the above, write 'I declare that I have no competing interests' below. If your reply is yes to any, please give details below.
