Reviewer’s report

Title: Blood signatures for second stage Human African Trypanosomiasis: A transcriptomic approach.

Version: 0 Date: 11 Nov 2019

Reviewer: Xiang Chen

Reviewer's report:

In this study the authors identified disease signatures of infection through transcriptome data from both the peripheral blood and cerebral spinal fluids of individuals diagnosed with trypanosome infections. Although the authors used reasonable analytical methods, the limited number of samples and the lack of validation experiments prevented the results from being published as conclusions.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

No

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.
