Reviewer's report

Title: Detecting and nutritional managing protocol of high-output stomas

Version: 2 Date: 9 April 2015

Reviewer: Samuel Tchum

Reviewer's report:

Minor Essential Revisions

1. Page 2. Line 9, page 4. Line 71, etc. Made a statement that “High-output was defined as output #1500-2000ml for three consecutive days”. I wanted to know the type of output discharged per the mentioned volume.

2. Page 4. Please kindly explain what a stoma is? A brief description would be useful.

3. Page 6, line 106. This patients should be These patients.

4. Some of the references are getting old.

5. Page 16. Cocktails of pharmacological treatments were mentioned in table 1 but the nutritional treatments for subjects were not so clear.

Quality of written English: Acceptable

Statistical review: Yes, but I do not feel adequately qualified to assess the statistics.
