Reviewer's report

**Title:** Efficacy and safety of oral branched-chain amino acid supplementation in patients undergoing interventions for hepatocellular carcinoma: a meta-analysis

**Version:** 1  **Date:** 1 June 2015

**Reviewer:** Vishal Singh

**Reviewer's report:**

**Summary:**
This is an interesting manuscript and research topic fitting for the Nutritional Journal’s interest. In the present study Ling Chen et al highlighted efficacy and safety of BCCA in patients undergoing interventions for hepatocellular carcinoma using meta-analysis approach.

**Minor Essential Revisions**
- Abstract and discussion too elaborative; would benefit from being shortened

**Quality of written English:** Needs some language corrections before being published

**Statistical review:** Yes, but I do not feel adequately qualified to assess the statistics.

**Declaration of competing interests:**
I declare that I have no competing interests.
