Reviewer's report

**Title:** Postprandial effects of encapsulated polyphenolic grape extract (PGE) on appetite and food intake: a randomised dose-comparison trial

**Version:** 2 **Date:** 23 April 2015

**Reviewer:** Hamed Kioumarsi

**Reviewer's report:**

In general, it is a good manuscript. However, the submission will be accepted after minor changes.

# The abstract is acceptable.
# Overall, the introduction is relevant and theory based
# Material and methods section: good enough
# Results and Discussion; the author needs to make some corrections, but in general is acceptable. The structure of the results and discussion is not really logical, which results in several redundancies and in a text going several times back and forth between topics.
# The formatting of the table needs to be revised. For example table 2; weight (g)
# References

Number 26: Obes Rev 2010 instead of Obesity Rev

I really enjoyed reading this article. Thank you! (smile)

**Quality of written English:** Acceptable

**Statistical review:** No, the manuscript does not need to be seen by a statistician.
