Reviewer’s report

**Title:** Effects of kiwi consumption on plasma lipids, fibrinogen and insulin resistance in the context of a normal diet

**Version:** 2  **Date:** 7 September 2015

**Reviewer:** Beng San Yeoh

**Reviewer’s report:**

The addition of Table 4 convincingly demonstrate that kiwi consumption indeed confer beneficial effects, which are more pronounced in groups that consumed more kiwi. All of my previous comments have been addressed.

Other minor comments:
1. Although 'kiwi', 'kiwifruit' and 'kiwi fruit' all refer to the same thing, it is better to only use one term for consistency.
2. Do check for spacing between words.

**Quality of written English:** Acceptable

**Statistical review:** Yes, but I do not feel adequately qualified to assess the statistics.
