Reviewer’s report

Title: The influence of academic examinations on energy and nutrient intake in male university students

Version: 3 Date: 28 August 2015

Reviewer: Frances Hillier-Brown

Reviewer’s report:

I am happy with the changes made by the authors and feel that they have answered my points sufficiently well to allow their manuscript to be published, once the following minor revisions (that the authors can be trusted to make) have been made.

Minor Essential Revisions

1. The first line of the Dietary Assessment section in the methods does not read well – suggest change to “Dietary intake was assessed using combined automated photographic records with a multiple pass 24-hour recalls.”

2. The number of examination data at the end of the results section needs removing (or putting in a table?).

3. There are a few minor typos – e.g. extra full stops and formatting of titles.

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
