Reviewer's report

Title: Impact of diet on cardiometabolic health in children and adolescents

Version: 2
Date: 27 October 2015
Reviewer: Jessy Abraham

Reviewer's report:

Thank for making revision as per my suggestions. However, your response to my Comment 8, you have included
"Yuan et al. (2013) showed that #2 servings per day of dairy products were associated with 1.74 mmHg (p<0.005) and 0.87 mmHg (p=0.010) lower systolic and diastolic blood pressure"

Like my comment 3, I still think that differences of 1.74 and 0.87 mm Hg is clinically insignificant therefore this reference should be omitted.

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
