Reviewer’s report

Title: The effects of EPA and DHA enriched fish oil on nutritional and immunological markers of treatment naïve breast cancer patients: A randomized double-blind controlled trial

Version: 0 Date: 19 Jun 2017

Reviewer: Melinda Phang

Reviewer’s report:

Overall, the manuscript is clear, concise and very well written reporting novel findings in an area of importance.

It would have been of interest to measure fatty acid uptake into PBMCs given that incorporation into leukocyte membrane are proposed to be essential for immunomodulation.

Please add reference to Tables 1 and 2 at first mention in the text (line 230-242).

Line 263: An increase in plasma n-6:n-3 ratio is reported in the FG, however it should report a DECREASE.

Line 330: Please replace the word 'NO' with 'NOT' in the context of 'not significant'.

Figure 2: Please provide a legend to the symbol used in 2A and 2B.

Level of interest
Please indicate how interesting you found the manuscript:

An article of importance in its field

Quality of written English
Please indicate the quality of language in the manuscript:
