Reviewer’s report

Title: Vitamin D status and dental caries in healthy Swedish children

Version: 2 Date: 30 Dec 2017

Reviewer: Robert Schroth

Reviewer's report:

The authors have addressed most of the items identified by this reviewer.

However, the reviewer is not satisfied with the authors' response to the recommendation to show the full models in Table 3. This is important information to share with future readers. At minimum, the authors should present the data for those variables remaining in the final backwards elimination. Sharing odds ratios for independent variables/covariates in the model would definitely enhance the table and strengthen the manuscript.

The authors should seriously give consideration to revising this Table to share these data with the reader.
