Title: Socioeconomic and ethnic differences in the relation between dietary costs and dietary quality: The HELIUS Study

Version: 0 Date: 15 Feb 2019

Reviewer: Tanefa Apekey

Reviewer’s report:

This is a well written and relevant research. The findings are very useful and could inform the design and components of public health initiatives especially those targeted at reducing inequalities in health. See below for some minor queries;

Line 92 The sample included Ghanaians but results and analysis used Africans. Can the authors clarify what they mean by Africans?

Line 94 The reference for the ethics approval could be provided here as evidence. The full name of the ethics committee instead AMC (if this is an abbreviation) would be useful to the reader.
