Reviewer’s report

Title: Estimating mean population salt intake in Fiji and Samoa using spot urine samples

Version: 0 Date: 04 May 2019

Reviewer: L Garneata

Reviewer's report:

The paper addresses to a very important topic i.e. the salt intake.

The results are promising and the information could be interesting for the readers.

Just two minor comments:

- The BMI is quiet high for a non-selected population in that area. Do the authors have any information about the energy intake, related to the salt intake, obviously?

- Sodium excretion is definitely influenced by the use of diuretics. The authors should provide additional information in this field.
