Reviewer's report

Title: Validation and reproducibility of a new iodine specific food frequency questionnaire for assessing iodine intake in Norwegian pregnant women

Version: 0 Date: 11 Aug 2019

Reviewer: L Garneata

Reviewer's report:

I have revised the paper entitled "Validation and reproducibility of a new iodine specific food frequency questionnaire for assessing iodine intake in Norwegian pregnant women". This is a very interesting topic worldwide, so I think it could be considered for publication.

The study design is very good for the aim, statistical analysis was proper.

I have just one minor comment. The Norwegian dietary habits are definitely different from the rest of the world and this should be mentioned as a limitation even in the abstract.
