Reviewer’s report

Title: EFFECT OF VITAMIN D FORTIFIED FOODS ON BONE MARKERS AND MUSCLE STRENGTH IN WOMEN OF PAKISTANI AND DANISH ORIGIN LIVING IN DENMARK: A RANDOMISED CONTROLLED TRIAL

Version: 1 Date: 11 Oct 2019

Reviewer: Patricia Khashayar

Reviewer's report:

The authors have revised the article perfectly, though I don't agree with their decision of removing of the phrases on ethnicity as while environment is of great importance and adding the time they lived in Denmark is quite necessary, ethnicity and genetic plays an important role on vitamin D and BTMs so I think it should be taken into account and so if the necessary information is not completely available, then just mention it as limitation.
