Reviewer’s report

Title: Association between egg consumption and elevated fasting glucose prevalence in relation to dietary patterns in selected group of Polish adults

Version: 1 Date: 21 Oct 2019

Reviewer: Caroline Richard

Reviewer's report:

I have no further comment except that the added limitation line 292-294 should be phrased as a limitation i.e. Another limitation of our study is the underreporting of habitual food intake especially in men. Although this is a common bias found in nutritional studies, it should be considered when interpreting the results… or something along those lines.

Level of interest
Please indicate how interesting you found the manuscript:

An article whose findings are important to those with closely related research interests

Quality of written English
Please indicate the quality of language in the manuscript:
