Reviewer’s report

Title: Vitamin D status in early childhood is not associated with cognitive development and linear growth at 6-9 years of age in North Indian Children: a cohort study

Version: 1 Date: 02 Feb 2020

Reviewer: Sebastiano Lava

Reviewer's report:

The Authors satisfactorily addressed most of my previous comments. Furthermore, in my opinion, the paper's quality consistently improved. Good job!

There are still some (few) minor English mistakes (e.g. "There are some evidence", page 38, lines 18-19; "in early life on neurodevelopmental may, however,…", page 39, lines 25-26; "are repeated every 3 month" instead of "months", page 41, line 91; "guidelines recommends" instead of "recommend", page 50, line 281), which might be corrected during the editorial process.

Thank you for providing a good-quality Figure 2. It is interesting to note that this Figure might suggest a (non-significant) trend.
