Reviewer’s report

Title: Validation of a roadmap for mainstreaming nutrition-sensitive interventions at state level in Nigeria

Version: 1 Date: 24 Feb 2020

Reviewer: Iyabo Obasanjo

Reviewer's report:

This is a vast improvement compared to the original submission. The only issues now are grammatical.
Line 2: Should be "National programs on nutrition are ..."
Line 93: Sentence starts with "Although", then there is no comparison. That sentence and the second one should be joined to have the idea be connected eg. Although, efforts have been made to ensure that interventions in the nutrition-sensitive sectors are aimed at impacting overall nutrition, achieving mainstreaming of such efforts have not occurred even when suggestions on indicators and pathways have been provided.
Line 216: Both genders were represented in the experts used and all had more than ten years experience.
Line 225: The sentence needs to be reconstructed, you cannot use firstly in the middle of a sentence. So should be something like: The changes from the expert review included changing of core concepts to more common words for clearer understanding. (there are no better words).
Line 329: ... there is a need to develop a new roadmap adapted to local context that..
Line 330: provides real solutions on how these sectors can contribute to improving nutrition.
Line 340...results might be due to enthusiasm about nutrition integration occurring in their sector.
(make sure there is a full stop after the sentence.)
