Reviewer’s report

**Title:** The Association between Maternal Urinary Phthalate Concentrations and Blood Pressure in Pregnancy: The HOME Study

**Version:** 3  **Date:** 4 September 2015

**Reviewer:** Kelly Ferguson

**Reviewer’s report:**

The authors did a very nice job responding to my comments. However they did not respond to one part of my previous comment #4—in regard to the new Table 1, it would be nice to highlight significant differences in the phthalates or blood pressure measurements by covariates. This isn’t just concern with statistical significance—it is a very large table and it would be helpful to the reader to draw attention to covariates that show differences in these levels. This is a recommended but discretionary revision.

**Level of interest:** An article of importance in its field

**Quality of written English:** Acceptable

**Statistical review:** No, the manuscript does not need to be seen by a statistician.

**Declaration of competing interests:**
