Reviewer’s report

**Title:** Concerns over use of glyphosate-based herbicides and risks associated with exposures: a consensus statement

**Version:** 3  
**Date:** 5 November 2015

**Reviewer:** Kate Guyton

**Reviewer’s report:**

I thank the authors for their careful consideration of reviewer comments. I agree with the revision, and find it fully acceptable for publication.

I have only one minor comment to raise, and suggest that the authors clarify the sentence on page 10, lines 30-31 to indicate that the issue has not been rigorously studied in the general population. In keeping with this comment, the authors may also consider, as they suggested would be done in their response document, rephrasing the sentence on line 40 of page 10 to indicate that the epidemiology studies provide evidence of carcinogenicity at levels of exposure actually experienced in human populations.

**Level of interest:** An article of outstanding merit and interest in its field

**Quality of written English:** Acceptable

**Statistical review:** No, the manuscript does not need to be seen by a statistician.

**Declaration of competing interests:**

I declare that I have no competing interests.
