Reviewer’s report

Title: Proposal for coordinated health research in PFAS-contaminated communities in the United States

Version: 0 Date: 27 Jul 2017

Reviewer: Richard W. Clapp

Reviewer's report:

This letter provides useful information to Environmental Health readers about an important emerging public health issue. The recommendations for a coordinated research strategy are well-considered and add an important perspective to ongoing planning in Federal agencies, universities and non-governmental organizations. The letter can also be useful and timely for those currently advocating for funds from the Congressional Defense Authorization Act to support a national study of communities affected by PFAS contamination near US military sites.
