Reviewer’s report

Title: Bisphenol A Increases Risk for Presumed Non-Alcoholic Fatty Liver Disease in Hispanic Adolescents in NHANES 2003-2010

Version: 0 Date: 15 Dec 2017

Reviewer: Angela Slitt

Reviewer’s report:

In the methods, please add more detail regarding the method used to quantify urinary BPA. Is this total BPA or free BPA? The citation #30 is not complete.

Discussion should also address if the liver is compromised metabolically from NAFLD, this could influence the BPA metabolism and disposition, and ultimately what is detected in urine. Livers with NAFLD tend to have lower glucuronidation and sulfonation.

Level of interest
Please indicate how interesting you found the manuscript:

An article of importance in its field

Quality of written English
Please indicate the quality of language in the manuscript:

Needs some language corrections before being published

Declaration of competing interests
Please complete a declaration of competing interests, considering the following questions:

1. Have you in the past five years received reimbursements, fees, funding, or salary from an organisation that may in any way gain or lose financially from the publication of this manuscript, either now or in the future?

2. Do you hold any stocks or shares in an organisation that may in any way gain or lose financially from the publication of this manuscript, either now or in the future?

3. Do you hold or are you currently applying for any patents relating to the content of the manuscript?

4. Have you received reimbursements, fees, funding, or salary from an organization that holds or has applied for patents relating to the content of the manuscript?

5. Do you have any other financial competing interests?
6. Do you have any non-financial competing interests in relation to this paper?

If you can answer no to all of the above, write 'I declare that I have no competing interests' below. If your reply is yes to any, please give details below.

I declare that I have no competing interests
