Title: Challenging Dominant Breast Cancer Research Agendas: Perspectives on the Outcomes of the Interagency Breast Cancer and Environment Research Coordinating Committee

Version: 1 Date: 11 Apr 2019

Reviewer: Veena Singla

Reviewer's report:

The revisions have significantly strengthened the paper. The relevance of the findings and analysis to an environmental health audience are clearer. Overall, this article conducts research from a social science perspective not typical in environmental health, which makes it a valuable contribution and of interest to multiple audiences involved in environmental health science and policy, including scientists, government, NGOs and advocates.
