Reviewer's report

Title: The Impact of Long-Term PM2.5 Exposure on Specific Causes of Death: Exposure-Response Curves and Effect Modification among 53 million U.S. Medicare Beneficiaries

Version: 2 Date: 07 Feb 2020

Reviewer: Jonathan Levy

Reviewer's report:

This is a third review of an article investigating the association between long-term exposure to fine particulate matter and mortality among the Medicare population. My last set of comments were generally minor and the authors were responsive. I have nothing further.

Level of interest
Please indicate how interesting you found the manuscript:

An article whose findings are important to those with closely related research interests

Quality of written English
Please indicate the quality of language in the manuscript:
