Reviewer’s report

Title: Impacts of food contact chemicals on human health: a consensus statement

Version: 0 Date: 20 Jul 2019

Reviewer: Peter Mercea

Reviewer's report:

The manuscript “Impacts of food contact chemicals on human health: a scientific consensus statement” ENHE-D-19-00206 presents a statement position of a large group of known experts on the potential impact of FCC's from food packaging articles on human health and how the control of this problem should be improved by the legislators. Myself being involved in the same field since more than 25 years I know how slowly consumer protection legislation is adapted to the scientific evidence which accumulates do to the work of many scientists. In this respect I would try to recommend the authors to consider in the Conclusions of their manuscript the presentation of some kind of action plan (for the legislators) on how to translate the proposed "Options for improvement" into the practice of verifying the compliance of food packaging.

Level of interest
Please indicate how interesting you found the manuscript:

An article of importance in its field

Quality of written English
Please indicate the quality of language in the manuscript:
