Reviewer’s report

Title: How I Do It: Feasibility of a new ultrasound probe fixator to facilitate high quality stress echocardiography

Version: 0 Date: 27 Nov 2017

Reviewer: Albert Varga

Reviewer’s report:

This is a short report about a newly developed tool to fixate the ultrasound probe to the patient's chest during exercise echocardiography testing. The Authors tested the Probefix in 2 patients.

I have only minor comments

- The Authors tested the tool in only 2 patients. Therefore, this study can be considered only as a pilot study.
  o please, indicate it in the title;
  o the Authors have to emphasize, that this was only a pilot study and a large scale verification is needed at this point.

Level of interest
Please indicate how interesting you found the manuscript:

An article whose findings are important to those with closely related research interests

Quality of written English
