Title: How I Do It: Feasibility of a new ultrasound probe fixator to facilitate high quality stress echocardiography

Version: 1 Date: 28 Feb 2018

Reviewer: Elisabetta Bianchini

Reviewer’s report:

The manuscript was correctly revised according to the suggestions. I suggest few mandatory minor revisions for the authors:

1) page 10 lines 224-226: why are you referring to "ionizing radiation" when talking about ultrasound? please specify which "ionizing radiation" are you taking into consideration or remove these lines.

2) I would suggest in the limitations section to add that a direct comparison with manual obtained measurements in terms of feasibility/repeatability of the measurements will be performed. As an alternative you can refer to previous scientific papers reporting % feasibility with manually handling echo probe.
