Reviewer’s report

Title: The assessment of pressure-volume relationship during exercise stress echocardiography predicts left ventricular remodeling and eccentric hypertrophy in patients with chronic heart failure

Version: 0 Date: 11 Mar 2019

Reviewer: Karina Wierzbowska-Drabik

Reviewer's report:

Congratulations for this interesting study, well-written methodologically and clinically important.

Please check and correct:

1. the lacking correct odds ratio in abstract for ESPVR

2. the lacking word "diminished" or "worsened" before phrase "indices of systolic function" in Results section, second paragraph, although choosen option o naming LV EF /CPOM and ESPVR as indices of disfunction is possible but a bit not clear at first
