Reviewer’s report

Title: Evaluation of right ventricular function in fetuses with isolated single umbilical artery using spatiotemporal image correlation M-mode

Version: 0  Date: 22 Jun 2019

Reviewer: Lamia Ait Ali

Reviewer's report:

In this study, the authors evaluated the Evaluation of right ventricular function in fetuses with isolated single umbilical artery using spatiotemporal image correlation M-mode. They found a There was a significant difference in f-TAPSE between the SUA at the third trimester and control group. Moreover the TAPSE increased with GA.

The study is well described.

Some comments have to be addressed

- Did you exclude fetus with CHD
- Even if the difference was significant between the third trimester group and control group, did you test predictors of lower TAPS n SUA group
- Did you test the correlation between birth at weight and TAPSE
- did you measure the TAPSE after birth?
