Title: Evaluation of right ventricular function in fetuses with isolated single umbilical artery using spatiotemporal image correlation M-mode

Version: 1 Date: 02 Jul 2019

Reviewer: Lamia Ait Ali

Reviewer's report:

Thanks to the authors for their exhaustive answer.

just a couple of comments: I don't think that the following sentence is useful, "the authors believe that if the study continues in the future with a large sample size of the isolated SUA, we can predict the weight of isolated SUA fetuses with f-TAPSE in third trimester" the aim of the study is not to predict the birth weight, moreover how could you exclude that the difference of TAPSE between the 2 groups doesn't reflect only a lower weight and not a RV dysfunction
