Reviewer’s report

Title: Clinical implication of disturbed left atrial phasic functions in the heterogeneous population associated with hypertension or atrial fibrillation

Version: 1 Date: 18 Sep 2019

Reviewer: Jun-Bean Park

Reviewer's report:

I appreciate the authors for the work that they have done to improve this manuscript. There are only minor issues with the revised manuscript.

1. Please provide a brief interpretation of the results on the inter- and intra-observer variability of LA strain and strain ratio indexes measurements. When compared to inter-observer and intra-observer variability for indices, could the differences in measurements between groups be considered clinically relevant?

2. The revised manuscript still has some typographical errors, such as "without history cardiovascular or systemic disease". The authors should fix typographical errors throughout the manuscript.
